## Exterior Films, Part 3

Our third and final installment in Exterior windows films looks at the wide range of products that Hanita offers for exterior applications. Previous articles [found here](#) discussed the reasons exterior films

are increasingly needed, and the differences in life expectancy as compared to interior films. Hanita Coatings' XtraZone exterior films include 10 different films, all using the second-generation, industry-leading technology that Hanita has developed. Develop your expertise in this high-value market segment by reading our articles, and by contacting HanitaTek for all the details!

## PolyZone

Are you being asked to install window film on polycarbonate (Lexan) or acrylic (PlexiGlas) glazings? Hanita Coatings has the answer for you!

PolyZone is Hanita Coatings line of films made specifically for plastic glazings. These films are specially formulated to resist blisters and bubbles that result from the thermal expansion and contraction that plastic glazing exhibits.

### Quick Facts

- Silver 20 Exterior, 6 Mil Anti-Graffiti Exterior available in 60"
- Warranted for exterior and interior applications
- Adheres to most polycarbonate, PMMA and glass
- No blistering, bubbling or delamination
- Adhesive removes cleanly
- Helps preserve plastic glazing from weathering
