PROTECTION... AND PEACE OF MIND.

Forced entries. Terrorist attacks. Severe weather.

We live in an uncertain world faced with issues we take seriously. HanitaTek's SafetyZone™ window films were engineered to address the realities of living and working in today's glass filled environments.

SafetyZone films are produced for resistance to impact, blast and natural disaster; with a special scratch-resistant coating for exterior applications; and for anti-graffiti use.

SafetyZone films can also be customized with heat and glare protection for increased comfort and energy savings.

And when film alone won't provide adequate protection, we also offer SafetyZone Advanced Security Solutions™.

SafetyZone. State-of-the art protection for your properties... and the people inside them.

TESTED. AND ACCREDITED.

SafetyZone films have been tested and accredited according to the most stringent standards worldwide.

- EN 12600
- ANSI Z-97.1
- BS 6206
- CPSC 1201
- EN 356
- DIN 52290
